

Outdoor Target Frame Usage

The Outdoor Frames are re-designed. The “chicken Fence” is still available and can be used like before with spring type clothes pins to secure the targets.

Added is a “rail system” so a piece of cardboard or ¼” plywood can be slipped into the frame as pictured below. Then the target can be stapled to the cardboard/plywood. The staples to use are the light weight and short length staples.

Examples JT-21 or T-50 Arrow style length ½” or less.
